DETAILED ACTION

* Pursuant to 35 USC 131, **Claims 1-2** are presented for examination.

Claim Rejections - 35 USC § 102

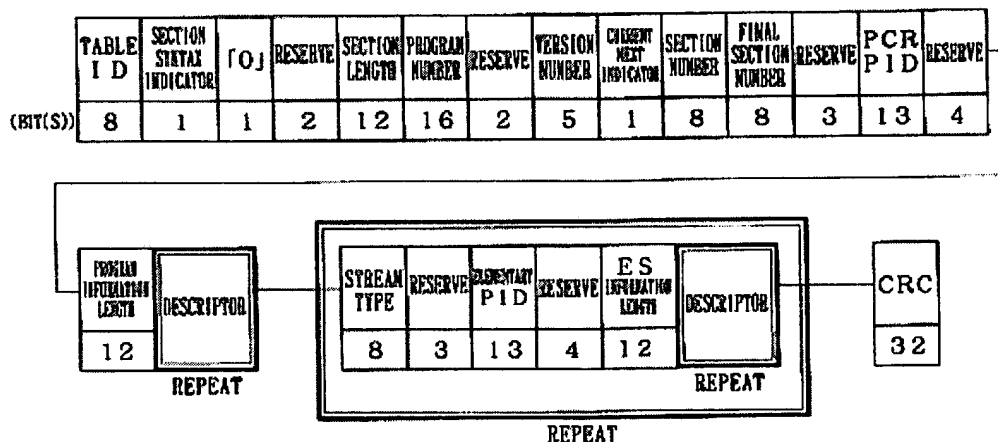

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

1.1 **Claims 1-2** are rejected under 35 U.S.C. 102(e) as being anticipated by **Ohishi et al.** (USP No. 6,480,551, filed November 17, 1998).

As per **Claims 1-2**, **Ohishi et al.** discloses an equivalent change detection in broadcast table for data parsing/updating comprising comparing 1st section number/crc-32 and 2nd section number/crc-32 in Fig. 6.

FIG. 6**Claim Rejections - 35 USC ' 103**

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2133

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2.1 Claims 1-2 are rejected under 35 U.S.C. 103(a) as obvious over Applicants' Admitted prior art (hereinafter Admitted prior art) and Cox et al. (Korean PN 000076757, 12/26/2000) of IDS of 1/24/05.

As per Claims 1-2, Admitted prior art substantially discloses an equivalent change detection in broadcast table for data parsing/updating comprising comparing 1st section number and 2nd section number in Fig. 1

Not specifically described in detail in Admitted prior art is the step whereby comparing involves CRC data/numbers.

However CRC is generally used for comparing data. Accordingly, Cox et al., in an analogous art, discloses data comparing via data CRC comparison in Abstract.

Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify the procedure in Admitted prior art by including therein data comparing via data CRC comparison as taught by Cox et al., because such modification would provide the procedure disclosed in Admitted prior art with a technique where magnitude of original numbers is not required in final compare operation/computation.
